DOCKETED ^{II.} FFB 4 2005

Confirmation

v transmits ha

Initials

- The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the
 international preliminary examination report and its annexes, if any, established on the international
 application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

INTERNATIONAL PRELIMINARY **EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/US 03/31876

Re Section V

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Reference is made to the following documents:

D1: WO0054985

- 2. Document D1 shows (page 8 line 1 - page 9, line 4):
- An authentication mark (11) applied to a substrate(10) for aiding in the a. determination of whether the substrate is authentic, comprising a first image (20) comprising a first compound (17), the first compound (17) adapted to be altered between at least a first state and a second state, wherein a change from the first state to the second state suggests that the substrate(10) is authentic, cf claim 1.
- b. A method of authenticating a substrate (19) having an authentication mark (11) on the substrate (10), wherein a consumer can perform at least a portion of an authentication, the mark (11) comprising a first image (20), wherein a first compound (17) is used to create at least a portion of the first image (20), the first compound (17) adapted to be altered between at least a first state and a second state, the method comprising: viewing the first image (20) when the first compound (17) is in the first state; changing the first compound (17) from the first state to the second state; viewing the first image (20) when the first compound (17) is in the second state; and determining whether the mark (11) is authentic based on a change between the first and second states, cf claim 31.

Therefore the subject-matter of claims 1 and 31 is not new, Article 33(2) PCT..

- 3.1 The additional features of dependent claims 2,5-7,9,10,12,14,16-30,32-37 are implicit in document D1 considering that D1 dscloses a security element comprising fluorescent and thermochromic parts- both of which can change from first to second states. The thermochromic part being readily tested by a consumer while the fluorescent part is invisible to the naked eye.
- 3.2 Dependent claims 8,11,13 and 15 do not appear to contain any additional features which involve an inventive step when combined with the subject matter of any claim to which they refer.

INTERNATIONAL PRELIMINARY International application No. PCT/US 03/31876 EXAMINATION REPORT - SEPARATE SHEET

4. The combination of the features of dependent claims 3 or 4 is neither known from, nor rendered obvious by, the available prior art.
